

Create Infographics of Pakistan's Energy & Environmental Challenges

Project Title	Create Infographics of Pakistan's Energy & Environmental Challenges
Project Summary	Create in-depth, easy-to-understand, and creative infographics of Pakistan's current situation, trends, and challenges in energy as well as environment, science, technology, and health (ESTH).
Country	United States
Country/Region of Focus	Pakistan

Project Description

While the Department of States has multiple memos, talking points, and databases on energy and ESTH issues, we need a format which captures this information in a way that all officers, regardless of their background, can understand quickly and accurately. The intern(s) will work primarily and directly with the Energy and ESTH Officer on the Pakistan Desk to design and create these infographics. Specific topics include: the energy shortage in Pakistan; U.S.-Pakistan cooperation in science, technology, and education; Pakistan's water challenges in the face of an increasingly growing population; and Pakistan's rank in the global fight against polio.
